Guests lectures: The impact of the the building small hydro-power plants on environment

Podgorica_18th of November 2018_Today has been organised lectures for the students on Biotechnical Faculty in Podgorica. Lectures has been attended by the students of Biology, Environmental protection as well as representatives of NGOs and media. Lecture has been lectured by the professor dr. Vladimir Pesic.

The topic was: The impact of the the building small hydro-power plants on environment. Academic community and students have a big role in environmental protection. So the main aim of this lectures was to improve student's knowledge about the main problems in environment and to push up them in proactive participation in environmental protection.

Activity was organized within the project: ENV.net factoring the environmental portfolio for WB and Turkey in the EU Policy Agenda which has been financed by the EU.
