ARTEMIS: Advancing the Resolute and Tangible Environmental Implementation of Standards

NGO Green Home has started the implementation of the project

â€žARTEMIS: Advancing the Resolute and Tangible Environmental Implementation of Standardsâ€œ, which aim to contribute to the further strengthening of Coalition 27 as an independent platform for a coordinated effort of Montenegrin CSOs to protect the environment in monitoring national reforms, implementing environmental standards and advocacy campaign for the public interest.

The overall objective of this project is to contribute to the alignment of national regulations and practices with the European environmental standards under the EU Accession process, through the informed public debates.

Specific project objectives are as follows:

1. To improve the civil society engagement in the process of adoption of European environmental standards and EU Accession negotiations under Chapter 27.
2. To increase the level of public understanding of the European environmental standards and public awareness of the key environmental problems in Montenegro
3. To enhance the public dialogue on environmental issues, by involving citizens, NGOs, media and public sector representatives

NGO Green Home is implementing project with partners: Centre for Protection and Research of Birds (CZIP), North Land and Association of Young Ecologists of Niksic (DMEN) with financial support from The Balkan Trust for Democracy.

Implementation period is 12 months, from July 2020 to July 2021.
