Lectures organized: "Marine protection through the establishment of marine protected areas"

Bar, 5th and 6th of March 2020 Green Home organized nine lectures for students from Primary school Ante Djedovic from Bar municipality. The main aim of the lectures were raising awareness about importance of protection marine biodiversity as well as introducing students with its main threat.

Students had opportunity to learn about importance of establishing marine protected areas and its benefits.

Katic island with surrounding has been planned to be first marine protected area in Montenegro. In this regard, had been presented video which shows marine biodiversity in Katic area.

Lectures were interactive so, students had opportunity to share their opinions regarding marine biodiversity and problems such as: pollution and illegal fishing and how individuals can contribute in marine biodiversity protection.

Lectures were attended by 250 of students.

Lectures were organized through the project: Support local communities involvement in promotion and protection the future marine protected area "Katic" which is financed by Critical Partnership fund "CEPF".
